A. <u>Judgment</u>. This Judgment is entered pursuant to Code of Civil Procedure sections 830 et seq., to comprehensively determine and adjudicate all Groundwater rights in the Borrego Springs Subbasin ("Basin") of the Borrego Valley Groundwater Basin, whether based on appropriation, overlying right, prescriptive right, or other basis of right in the Basin; and to provide a physical solution for the perpetual management of the Basin, which long-term management will achieve Sustainable Groundwater Management for the Basin consistent with the substantive objectives of the Sustainable Groundwater Management Act ("SGMA") and with reasonable and beneficial use under Article X, section 2 of the California Constitution. This Judgment considered together with the Groundwater Management Plan ("GMP") attached hereto as <u>Exhibit "1"</u> constitutes the Physical Solution; provided, however, that the provisions of this Judgment control over and supersede any contrary provisions contained in the GMP.

- **B.** <u>Basin</u>. The Basin is located in eastern San Diego County, California and underlies the unincorporated community of Borrego Springs and surrounding areas. The Basin includes three management areas: the north, central and south management areas. The California Department of Water Resources ("Department" or "DWR") designated the Basin as a critically overdrafted high-priority basin under SGMA.
- C. <u>Stipulation for Entry of Judgment</u>. A substantial majority of the Parties ("Stipulating Parties"), by number and by quantity of water rights herein adjudicated, stipulated for entry of a judgment in substantially the form of this Judgment. The stipulation for entry of judgment ("Stipulation") is dated and attached to this Judgment as <u>Exhibit "2</u>."
- **D.** <u>Pleadings</u>. The Complaint in this action was filed on _______, 2020, by Plaintiff, Borrego Water District ("District"), in the Superior Court for the County of San Diego, seeking a comprehensive determination of Groundwater rights and adjudication of water rights in the Basin pursuant to Chapter 7 (commencing with section 830) of Title 10, Part 2 of the Code of Civil Procedure. BWD, together with the County of San Diego ("County"), established a GSA for the Basin pursuant to SGMA in 2016. The County withdrew as a GSA, effective December 31, 2019. The Stipulating Parties represent to this Court that the optimal means of achieving

Sustainable Groundwater Management for the Basin consistent with the directives of SGMA and Article X, section 2 of the California Constitution, and to achieve a durable solution to alleviate the significant Overdraft now occurring in the Basin, is by way of this Comprehensive Adjudication of Groundwater rights, the substitution of the Watermaster in place of the GSA and the substitution of this Judgment as an alternative to a GSP under SGMA as approved by the Department and as authorized by Water Code sections 10733.6 and 10737.4. BWD filed the Complaint in this action, pursuant to the Stipulation among the Stipulating Parties, to undertake the Comprehensive Adjudication of Groundwater rights of the Basin pursuant to sections 830 et seq. of the Code of Civil Procedure and so comply with SGMA. Upon entry of this Judgment establishing the Watermaster, BWD is to withdraw as a GSA by notifying the Department under Water Code section 10723.8(e).

- E. <u>Notice of Commencement of Groundwater Basin Adjudication</u>. A Notice of Commencement of Groundwater Basin Adjudication with the information required by Section 836 of the Code of Civil Procedure was lodged with the Court on [DATE].
- **F.** <u>Answer To Adjudication Complaint</u>. A draft Answer to Adjudication Complaint ("Form Answer") in the form required by Section 836 of the Code of Civil Procedure was lodged with the Court on [DATE].
- G. <u>Court Approval of Notice & Form Answer</u>. BWD filed a motion pursuant to section 836 of the Code of Civil Procedure, and on <u>[DATE]</u>, the Court approved the Notice of Commencement of Groundwater Basin Adjudication and draft Answer to Adjudication Complaint and authorized service of the landowners overlying the Basin pursuant to Section 836 of the Code of Civil Procedure.
- H. Service. All holders of fee title to real property in the Basin were identified using the assessor or assessors of the County, and served by registered mail or certified mail, return receipt requested, or by other means authorized by the Court, the Notice, Complaint, and Form Answer to all holders of fee title to real property in the Basin. Where the physical address of the real property differed from the mailing address of the holder of fee title, the Notice, Complaint, and Form Answer were mailed by registered or certified mail, return receipt requested, to the

physical address of the real property and the mailing address of the holder of fee title. The notice was also published at least once per week for four consecutive weeks in one or more newspapers of general circulation in the County on all persons interested in the proceeding, consistent with Code of Civil Procedure section 835 and orders of this Court. A notice of completion of mailing was filed with the Court on [DATE] consistent with Code of Civil Procedure section 836.

- I. <u>Notice</u>. BWD provided the Notice and Form Answer to the Department and the County. The Department and County provided a link to the Notice and Form Answer on the home page of their respective websites consistent with Code of Civil Procedure section 836(m).
- **J.** <u>Parties</u>. All persons who hold fee simple ownership in a parcel in the Basin, or Pumps or stores water in the Basin, or that claim any other right or interest in the Basin are subject to the jurisdiction of the Court in this proceeding pursuant to Code of Civil Procedure sections 830 et seq.
- **K.** <u>Defaults</u>. Numerous Parties have failed to respond timely, or at all, to the Complaint, and their defaults have been entered. The Court has given the defaulted Parties notice of this Judgment and Physical Solution, together with the opportunity to be heard regarding this Judgment, and hereby enters default judgments against all such Parties and incorporates those default judgments into this Judgment.
- L. <u>Jurisdiction</u>. By the pleadings herein, operation of sections 830 et seq. of the California Code of Civil Procedure, and by Order of this Court, the issues have been made those of an in rem adjudication of all Basin Groundwater rights as between each and all of the Parties. Having complied with the notice and service requirements of Section 836 of the Code of Civil Procedure, the in rem jurisdiction over all Basin Groundwater rights and the comprehensive effect of this Comprehensive Adjudication have been established. This Court has jurisdiction of the subject matter of this action and of the Parties herein.
- M. <u>Stipulation for Entry of Judgment</u>. The Stipulating Parties represent a substantial majority of the Pumpers, by number and by quantity of water rights defined herein. The Judgment is consistent with and meets the requirements of Code of Civil Procedure section 850(b). The Stipulating Parties represent approximately _____ percent of all Pumpers and

- 1	
1	approximately percent of all BPA in the Basin. The Stipulating Parties intend for this Court to
2	comprehensively adjudicate all Groundwater rights in the Basin. BWD submitted the form of this
3	Judgment, inclusive of the GMP which together constitutes the Physical Solution that is
4	established by this Judgment, to DWR for review and approval to serve as an alternative to a GSP
5	pursuant to SGMA. (Wat. Code, §§ 10733.6; 10737.4.) DWR's approval was issued on
6	, 20
7	DECREE
8	NOW, THEREFORE, IT IS ORDERED, ADJUDGED AND DECREED:
9	I. DEFINITIONS AND EXHIBITS
10	A. <u>Definitions</u> . As used in this Judgment, the following terms shall have the meaning
11	set forth below.
12	1. <u>2030 Target</u> – A cumulative Basin-wide Rampdown of 50 percent by
13	Water Year 2029-2030.
14	2. <u>Adaptive Management</u> – Changes to Basin management based on new data
15	or improving science collected or acquired over time necessary to achieve and sustain Sustainable
16	Groundwater Management and reasonable and beneficial use of the Basin's water resources.
17	3. <u>Adjusted Pumping Calculation</u> – As defined in Section IV.E.4.
18	4. <u>AFY</u> – Acre-feet per Water Year.
19	5. <u>Annual Allocation</u> – The maximum amount of Pumping allowed for a
20	Party to this Judgment in a given Water Year (excepting any Pumping of Carryover or imported
21	water if available), which for any particular Water Year will be determined by multiplying the
22	Party's BPA by the Pumping Percentage in effect for that Water Year. Annual Allocation will be
23	rounded to the nearest whole acre-foot.
24	6. <u>Annual Report</u> – An annual report of Basin management and Watermaster
25	activities filed with this Court pursuant to Section IV.E(5) herein.
26	7. <u>Basin</u> – Borrego Springs Subbasin of the Borrego Valley Groundwater
27	Basin as defined by California Department of Water Resources (DWR) Bulletin No. 118 as
28	

-7-JUDGMENT

1	19. "DWR" or "Department" – The California Department of Water	
2	Resources.	
3	20. <u>Eligibility Requirement</u> – As defined in Section III.I(2).	
4	21. <u>Eligibility Proof</u> – As defined in Section III.I(2).	
5	22. <u>Eligibility Violation</u> – As defined in Section III.I(3).	
6	23. <u>Entry Agreement</u> – An agreement between Watermaster and a Party to	
7	enter private property consistent with the form of the template agreement set forth in Exhibit "8" .	
8	24. <u>Environmental Working Group (EWG)</u> – As defined in Section IV.H.	
9	25. <u>Form Answer</u> – A draft, form Answer to Adjudication Complaint approved	
10	by the Court pursuant to section 836 of the Code of Civil Procedure.	
11	26. <u>Fourth Five-Year Period</u> – Water Years 2035/2036 through 2039/2040.	
12	27. <u>Groundwater</u> – Water beneath the surface of the earth within the zone	
13	below the water table in which the soil is completely saturated with water, but does not include	
14	water that flows in known and definite channels. (Code Civ. Proc., § 832(g).)	
15	28. <u>Groundwater Dependent Ecosystem (GDE)</u> – Ecological communities or	
16	species that depend on Groundwater emerging from aquifers or on Groundwater occurring near	
17	the ground surface. (Cal. Code Regs., tit. 23, § 351(m).)	
18	29. <u>Groundwater Management Plan (GMP)</u> – The plan, attached to this	
19	Judgment as Exhibit "1," which, together with the Judgment, is intended to implement the	
20	Physical Solution for the Basin, satisfy the substantive objectives of SGMA, and serve as an	
21	alternative to a GSP under SGMA following approval by DWR, as authorized by Water Code	
22	sections 10733.6 and 10737.4.	
23	30. <u>GSA</u> – Groundwater Sustainability Agency as defined by Water Code	
24	section 10721(j).	
25	31. <u>GSP</u> – Groundwater Sustainability Plan as defined by Water Code section	
26	10721(k).	
27	32. <u>Lease</u> – A transfer of Annual Allocation or Carryover for one Water Year	
28	or for several Water Years, as set forth in a written lease agreement.	

-9-JUDGMENT

-10-JUDGMENT

67.

1	B. Exhibits. The following exhibits are attached to this Judgment and made a part	
2	hereof.	
3	Exhibit "1" Groundwater Management Plan	
4	Exhibit "2" Stipulation	
5	Exhibit "3" Minimum Fallowing Standards	
6	Exhibit "4" Baseline Pumping Allocations	
7	Exhibit "5" Watermaster Rules and Regulations	
8	Exhibit "6" Water Rights Restrictive Covenant Forms	
9	Exhibit "7" Process for Selecting Watermaster Public/Community Representative,	
10	Process for Selecting Watermaster Recreational Sector Representative, and Process for Selecting	
11	Watermaster Agricultural Sector Representative	
12	Exhibit "8" Entry Agreement Form	
13	C. <u>Construction</u> . Unless the context clearly requires otherwise:	
14	1. The plural and singular forms include the other;	
15	2. "Shall," "will," and "must" are each mandatory;	
16	3. "May" is permissive;	
17	4. "Or" is not exclusive; and	
18	5. "Includes" and "including" are not limiting.	
19	6. Reference to any agreement, document, instrument, or report means	
20	such agreement, document, instrument or report as amended or modified and in effect from time	
21	to time in accordance with the terms thereof.	
22	II. PHYSICAL AND LEGAL SETTING	
23	A. <u>Complexity and Scope of Action</u> . The physical and legal issues of this case are	
24	complex. Pumping of more than persons Pumping Groundwater from the Basin has been	
25	ascertained. In excess of,000 persons have been served. The Groundwater rights of the entire	
26	Basin have been brought into issue and the action has been made a full in rem adjudication o	
27	water rights to the Basin as to all real property owners in the Basin pursuant to Sections 830 e	
28	seq. of the Code of Civil Procedure.	

27

- В. **Basin as Common Source of Supply.** The area of the Basin is defined by Bulletin 118 issued by the Department of Water Resources and identified by Bulletin 118 as Subbasin No. 7-24.01. The Groundwater within the Basin constitutes a common source of supply to the Parties herein and the Borrego Springs community.
- C. Overdraft and Need for Physical Solution. The Basin has been, and presently is, in a condition of long-term Overdraft for a period longer than ten years consistent with Code of Civil Procedure sections 832(d) and 847(a). There is presently no viable means to cure the Basin's Overdraft through artificial recharge or other supply augmentation strategy under current Basin conditions and cumulative average annual Pumping quantities. Therefore, it is necessary, and consistent with applicable law, to implement the Physical Solution set forth in this Judgment inclusive of the prescribed Rampdown over time. The Physical Solution takes into consideration the unique physical and climatic conditions of the Basin, the use of water within the Basin, the character and rate of return flows, the character and extent of established uses, and the current lack of availability of imported water. This Court has received evidence to support its conclusion that the Physical Solution appropriately balances competing economic, social, and environmental considerations, and that it will result in the optimal management of the Basin consistent with Article X, section 2 of the California Constitution.
- D. **Need for Flexibility.** The Physical Solution is intended to provide flexibility and adaptability to allow this Court to use existing and future technological, social, institutional, and economic options to maximize reasonable and beneficial water use in the Basin.
- Ε. **Determination of Sustainable Yield.** The initial Sustainable Yield is 5,700 AFY. A refined and specific estimate of the Sustainable Yield shall be determined by the Watermaster by January 1, 2025, and periodically updated thereafter, through the Technical Advisory Committee processes described herein based on best available science including BVHM runs and consideration of all sources of Basin replenishment and outflow.
- F. Judgment as a Basis of SGMA Compliance for the Basin. Consistent with the requirements of Water Code section 10737.8, this Court finds this approach for compliance with SGMA, and the comprehensive determination of all Groundwater rights within the Basin, to be a

prudent, legal, and durable means to achieve Sustainable Groundwater Management within the Basin as intended by SGMA. This Court further finds that the Physical Solution is consistent with the mandate of Article X, section 2 of the California Constitution and California water policy, generally. The Judgment defines the Groundwater rights of the Basin in a manner which will equitably allocate the Basin's Groundwater supplies. Sufficient information and data are known to formulate a reasonable and just allocation of existing Groundwater supplies. Such Physical Solution will accelerate water-saving actions and provide flexibility and adaptability in order to maximize the reasonable and beneficial use of the Basin's Groundwater and protect against undue economic harm to the Borrego Springs community.

Pumping Groundwater Only Pursuant to Judgment. This Judgment, and the Physical Solution decreed herein, addresses all Groundwater rights of the Basin. Any Pumping inconsistent with this Judgment will frustrate efforts to achieve Sustainable Groundwater Management and public, environmental, and economic interests in the Basin, injure the rights of all Parties, and interfere with the Physical Solution. Therefore, each and every Party, its officers, agents, employees, successors, and assigns, is enjoined and restrained from Pumping Groundwater from the Basin except pursuant to the provisions of this Judgment. Should Watermaster become aware of any unauthorized Pumping, it shall promptly bring a motion before this Court to enforce the terms of this Judgment pursuant to Section IV.E(9).

III. DECLARATION OF RIGHTS AND OBLIGATIONS

A. <u>Pumping Rights</u>. The BPA of each Party is as set forth in <u>Exhibit "4</u>." <u>Exhibit</u> "4" also identifies the legal parcel(s) to which the BPA attaches (excepting the BWD and County) and the well(s) to which the BPA is assigned.

If BPA is transferred to one or more new BPA Parcels and wells pursuant to a Permanent Transfer, Watermaster will update <u>Exhibit "4"</u> to identify the reallocated BPA to each Party to the transfer, new BPA Parcel(s) and well(s) (excepting the BWD and County with respect to BPA Parcel) to which the BPA is assigned and include an updated version of <u>Exhibit "4"</u> as an attachment to its Annual Report. No Party may commence Pumping Groundwater pursuant to BPA following October 1, 2020, until and unless (i) the Party has paid the full assessment

assessed by Watermaster to fund the Watermaster through the first permanent Pumping Assessment in December 2021, and (ii) the Party is compliant with all orders of the Court, including without limitation, payment of all assessments or other monies owed to Watermaster or any other Party(ies) pursuant to order of the Court.

The BPA represents the allowed total annual Pumping by each Party prior to the commencement of the 2020-2021 Water Year. The BPA will be subject to the Rampdown commencing with the 2020-2021 Water Year. Through operation of Rampdown and the resulting Pumping Percentage then in effect, each Party's allowed Pumping for each Water Year will be limited to a percentage of their BPA as reflected within their Annual Allocation. Pumping of Groundwater used to fight fires shall be exempt from Pumping limitations and associated assessments.

All water credits issued by BWD and/or the County pursuant to the BWD's Demand Offset Mitigation Water Credits Policy (revised May 19, 2015) have been converted to BPA and are included in **Exhibit "4"**, unless otherwise agreed to by the water credit holder and BWD and approved by the Court. To the extent a former water credit holder no longer owns real property overlying the Basin at the time of this Judgment, the associated BPA is held in abeyance, in the name of such owner until the BPA is attached to a specific legal parcel pursuant to the Judgment.

The basis for the amount of each Party's BPA set forth in Exhibit "4" to the Judgment is as follows: (i) for the BWD, a compromise amount agreed upon among the Parties that is based on metered data and water credit conversion; (ii) for Parties that previously held water credits pursuant to the BWD's Demand Offset Mitigation Water Credits Policy (revised May 19, 2015), the amount of BPA calculated based on a conversation factor taking into account water credit type, formerly irrigated acreage, and relevant crop types of the formerly irrigated agricultural acreage; and (iii) for all other Parties granted BPA, the amount of BPA specified in a final letter addressed to each Party from Jim Bennett, Water Resources Manager for the County's Planning and Development Services, which the GSA intended to allocate to each of those Parties pursuant to the previously anticipated GSP and that is based on metered data or irrigated acreage calculated

by the GSA for relevant crop types.¹ This Court acknowledges that the individual BPA established for each Party reflects the settlement and compromise of the Parties respecting water rights among them subject to the terms of this Judgment. Such water rights are a form of property right, subject to rights and restrictions pursuant to the reasonable and beneficial use doctrine set forth in Article X, section 2 of the California Constitution. The allocation of BPA among the Parties reflects a compromise of all water rights of all Parties to this action, which the Court finds to be equitable and consistent with applicable law, including but not limited to Article X, section 2 of the California Constitution. All BPA are of equal priority.

It is therefore consistent with constitutional protections afforded to the Parties, California's common law, and the interest of legal certainty that the BPA adjudicated cannot be adjusted following the entry of this Judgment. Sustainable Groundwater Management of the Basin will be achieved through the Physical Solution prescribed herein inclusive of the necessary Rampdown to alleviate the current Overdraft.

B. <u>Carryover</u>. Unused Annual Allocation may be carried over for use in subsequent Water Years as Carryover if the Pumping Assessment is paid in the current year, subject to restrictions on the amount or duration of Carryover specified below. The initial maximum quantity of Carryover that a Pumper can accrue is two times the amount of BPA then held by that Pumper. Carryover will be re-evaluated by January 1, 2025, by Watermaster, with consultation of the Technical Advisory Committee. If Watermaster determines that it is necessary to adjust the amount of individual Carryover or the duration that Carryover may be held within the Basin to prevent Undesirable Results, the Watermaster shall so advise this Court through a noticed motion for a subsequent order amending this Judgment. Once Carryover is accrued pursuant to rules then in effect, the rules may not be changed as to the accrued Carryover (e.g., the rate or amount of loss may not be modified) because the Groundwater reflected in Carryover is treated, for purposes of Basin-wide production accounting, as if already Pumped and used. Accordingly,

¹Certain Parties are granted BPA based on such County of San Diego letters and based on previously-held water credits. In those circumstances, the amount of the Party's BPA specified in Exhibit 4 reflects a combination of the BPA resulting from both bases.

any Basin-wide need for reduced Pumping will be achieved through additional Rampdown of BPA rather than reduction of a Pumper's existing Carryover.

C. <u>Technical Approach to Basin Management</u>. The Physical Solution, including this Judgment and the GMP attached as <u>Exhibit "1</u>," will serve as the technical approach for Basin management, subject to modification as appropriate for Adaptive Management by order of this Court pursuant to this Court's continuing jurisdiction under Section VII, including periodic updates of Sustainable Yield through the processes described herein.

D. Rights of State Park and Borrego Elementary School.

- 1. In lieu of a grant of BPA to the State Park, the State Park will be authorized to Pump an annual maximum of 20 acre-feet of Groundwater for their uses. Such authorization is distinct from the Pumping rights of other Pumpers pursuant to BPA. The State Park's authorized Pumping pursuant to this Section III.D shall not be subject to Rampdown, and also shall not be eligible for Carryover, Lease, or subsequent transfer, and will be subject to all other relevant provisions of this Judgment including but not limited to payment of an assessment on each acre-foot of water pumped that is equivalent to the Pumping Assessments charged to Party's Pumping BPA, consistent with Section IV.E(4).
- 2. In lieu of a grant of BPA to Borrego Elementary School, the Borrego Springs Unified School District will be authorized to Pump an annual maximum of 22 acre-feet of Groundwater for exclusive use at Borrego Elementary School. Such authorization is distinct from the Pumping rights of other Pumpers pursuant to BPA. Borrego Springs Unified School District's authorized Pumping pursuant to this Section III.D shall not be subject to Rampdown, and also shall not be eligible for Carryover, Lease, or subsequent transfer, and will be subject to all other relevant provisions of this Judgment including but not limited to payment of an assessment on each acre-foot of water pumped that is equivalent to the Pumping Assessments charged to Party's Pumping BPA, consistent with Section IV.E(4).
- **E.** <u>Initial Rampdown</u>. The Rampdown schedule through the 2024-2025 Water Year is as follows:

Water Year Annual Rampdown Schedule Cumulative Rampdown

1	2020-2021	5% reduction of BPA	5%
2	2021-2022	5% reduction of BPA	10%
3	2022-2023	5% reduction of BPA	15%
4	2023-2024	5% reduction of BPA	20%
5	2024-2025	5% reduction of BPA	25%
6	F.	Process for Determining	Sustainable Yield and Implementation of
7			
8			ce of Rampdown for the Water Years following the
9	2024-2025 Water Year (i.e., commencing with the 2025-2026 Water Year) will be determined		
10	through the fol	lowing process:	
11		1. By June 1, 2021, the Wa	atermaster shall seek agreement with the Technical
	Advisory Con	nmittee on a scope of work and	budget for technical work through September 30,
12	2023. Any d	sisputes as to scope or budget v	will be resolved on hearing and order pursuant to
13	Section VII p	prior to the commencement of t	the Water Year beginning October 1, 2021. The
14	choice to per	rform specific technical tasks	will be informed by considering the value and
15	importance of	the work to attain a better und	erstanding of the Basin and the goal of advancing
16	Sustainable G	roundwater Management in com	nparison to the cost of the work.
17		2. During the first four	Water Years (2020-2021 to 2023-2024), the
18		C	refine the BVHM, using model runs to update the
19			ation with the Technical Advisory Committee.
20			·
21		•	e Watermaster will, following receipt of input and
22			risory Committee, revise the determination of
23	Sustainable Y	ield for Water Years 2025/20	26 through 2029/2030 (the "Second Five-Year"
	Period"). Th	ne revised determination of S	Sustainable Yield will consider all sources of
24	replenishment,	including return flows and und	erflows, and all outflows from the Basin, and will
25	consider, amo	ng other data, information de	rived from updated runs of the BVHM. Any
26	disagreement v	vith Watermaster's determinatio	n may be appealed to this Court for review, subject
27	to the provisio	ons of Section VII. The revised	l estimate of Sustainable Yield will determine the
28			iod as provided in Section III.F.5 of this Judgment.

- 4. If the revised estimate of Sustainable Yield remains at 5,700, AFY the Rampdown rate will continue at five percent per year for the Second Five-Year Period, thus achieving a cumulative Basin-wide Rampdown of 50 percent by Water Year 2029-2030 ("2030 Target").
- 5. If the revised estimate of Sustainable Yield for the Second Five-Year Period exceeds or falls below 5,700 AFY, the Rampdown Rate will be reduced or increased, and the 2030 Target will be increased or reduced, proportional to the percentage that the revised estimate of Sustainable Yield exceeds or falls below 5,700 AFY, thus achieving a cumulative quantity of all Pumpers' Annual Allocation equal to the mid-point between the revised estimate of Sustainable Yield and the cumulative quantity of all Pumper's BPA by Water Year 2029-2030.
- 6. By January 1, 2025, the Watermaster will also determine a scope of work and budget for further technical work through September 30, 2029. Any disagreement with Watermaster's determination may be appealed to this Court for review, subject to the provisions of Section VII.
- 7. By January 1, 2030, the Watermaster will, following receipt of input and recommendations from the Technical Advisory Committee, determine the revised estimate of Sustainable Yield for Water Years 2030/2031 through 2034/2035 (the "Third Five-Year Period"). The revised determination of Sustainable Yield will consider all sources of replenishment, including return flows and underflows, and all outflows from the Basin, and will consider, among other data, information derived from updated runs of the BVHM. Any disagreement with Watermaster's determination may be appealed to this Court for review, subject to the provisions of Section VII. The revised estimate of Sustainable Yield will determine the Rampdown Rate for the Third Five-Year Period as described in Section III.F(8) of this Judgment.
- 8. The annual Rampdown Rate for each Water Year of the Third Five-Year Period will be calculated to reduce the then cumulative allowed Pumping (i.e., cumulative Annual Allocation in effect for Water Year 2029-2030) over 10 years to equal the revised determination of Sustainable Yield by Water Year 2039-2040. Thus, the annual Rampdown Rate will be established by dividing the necessary ten-year cumulative Rampdown by ten.

- 9. By January 1, 2030, the Watermaster will also determine a scope of work and budget for further technical work through September 30, 2034. Any disagreement with Watermaster's determination may be appealed to this Court for review, subject to the provisions of Section VII.
- 10. By January 1, 2035, the Watermaster will, following receipt of input and recommendations from the Technical Advisory Committee, determine the revised estimate of Sustainable Yield for Water Years 2035/2036 through 2039/2040 (the "Fourth Five-Year Period"). The revised determination of Sustainable Yield will consider all sources of replenishment, including return flows and underflows, and all outflows from the Basin, and will consider, among other data, information derived from updated runs of the BVHM. Any disagreement with Watermaster's determination may be appealed to this Court for review, subject to the provisions of Section VII(A). The revised estimate of Sustainable Yield will determine the Rampdown Rate for the Fourth Five-Year Period as described in Section III.F(11) of this Judgment.
- 11. The annual Rampdown Rate for each Water Year of the Fourth Five-Year Period will be calculated to reduce the then cumulative allowed Pumping (i.e., cumulative Annual Allocation in effect for Water Year 2034-2035) over five years to equal the revised determination of Sustainable Yield by Water Year 2039-2040. Thus, the annual Rampdown Rate will be established by dividing the necessary five-year cumulative Rampdown by five.
- 12. Notwithstanding the Rampdown schedule described herein, this Court, pursuant to motion of any Party or sua sponte, may adjust the rate of Rampdown up or down for any 5-year period or subdivision thereof, upon a finding that an adjustment to the Rampdown Rate is appropriate, and taking into account the limitations on Pumping necessary to avoid an Undesirable Result.
- G. <u>Overproduction</u>. This Court finds that it is appropriate to afford (i) reasonable time and accommodation to allow the Parties to adjust to the initiation of Pumping limitations under this Judgment during the initial Water Years, and (ii) reasonable flexibility to allow a Party that has overproduced its Annual Allocation in a particular Water Year to cover the

Overproduction during the next Water Year. Therefore, the following Overproduction rules apply:

- 1. Overproduction up to the Max Overproduction Limit (defined below), must be covered within one year of the Overproduction, either by using less allocation (under-Pumping the allowed Annual Allocation or applying Carryover) in the subsequent Water Year or by Lease or Permanent Transfer from another Party. If not covered by under-Pumping, Carryover, Lease, or Permanent Transfer in the subsequent Water Year, the Party will be assessed an Overproduction Penalty Assessment. In calculating Overproduction, any Carryover will be applied first to the Party's production, then any Groundwater Pumped pursuant to a Lease, and then the Party's Annual Allocation, so that Overproduction does not occur until the Party has exceeded the sum of its Carryover, Leased Annual Allocation/Carryover, and its Annual Allocation. The first Groundwater produced by a Party during any Water Year will be deemed to be an exercise of any Carryover.
- 2. During the first three Water Years (2020-2021 through 2022-2023; Water Years 1-3), no Party will be subject to an immediate Overproduction Penalty Assessment so long as such Party's total cumulative Overproduction in those Water Years does not exceed 20 percent of the Party's total cumulative Annual Allocation for those Water Years ("Max Overproduction Limit"). Any Party that engages in Overproduction in any of Water Years 1-3 that does not exceed the Max Overproduction Limit will be notified by the Watermaster of the amount of Overproduction annually during Water Years 1-3 following the end of Water Year. The Party engaging in Overproduction shall cover the cumulative quantity of its Overproduction occurring in Water Years 1-3 by the end of Water Year 5 (2024-2025) through either Carryover, reduced production below authorized Annual Allocation in Water Years 4 (2023-2024) and 5 (2024-2025), or through Lease or Permanent Transfer. If the Party has not covered its Overproduction from Water Years 1-3 by the end of Water Year 5 (September 30, 2025), an Overproduction Penalty Assessment will be assessed.
- 3. Any Party that engages in Overproduction in any of Water Years 1-3 that does exceed the Max Overproduction Limit will be assessed an Overproduction Penalty

16 | 17 | 18 | 19 | 20 | 21 | 22 | 23 | 24 | 25 | 26 | 27 | 28 |

Assessment for the Overproduction in excess of the Max Overproduction Limit unless such Overproduction in excess of the Max Overproduction Limit is covered and cured through under-Pumping, Carryover, Lease, or Permanent Transfer for all such Overproduction during the subsequent Water Year.

- 4. The Watermaster has the authority to enforce the terms of this Judgment, including the Rules and Regulations and Physical Solution, which authority includes at a minimum, the enforcement authority granted to a GSA under Water Code section 10732. Notwithstanding the monetary limits in Water Code section 10732(a)(1), the Watermaster has authority to establish an Overproduction Penalty Assessment, which will be no less than \$500 per acre-foot. All Overproduction Penalty Assessments will be used by Watermaster to fund either (i) acquisition of Annual Allocation to offset the Overproduction or (ii) its Watermaster Budget and thereby reduce the amount of funds that must be raised from the annual Pumping Assessment. Failure to pay the Overproduction Penalty Assessments will incur further enforcement terms, as permitted by law, including but not limited to the right of the Watermaster to seek injunctive relief and the right to lien real property for unpaid assessments.
- H. <u>De Minimis Pumpers</u>. This Court finds that production of Groundwater by any person or entity owning real property overlying the Basin who is a De Minimis Pumper at the time of filing of the Complaint is not likely to significantly contribute to Undesirable Results to the Basin or any interest related to the Basin. Accordingly, this Judgment is not intended to regulate a Party that was Pumping Groundwater as a De Minimis Pumper at the time of filing of the Complaint, provided the Pumping by such De Minimis Pumper remains within the two acre foot limitations established in this Judgment and provided that such De Minimis Pumper does not seek to transfer their Pumping to another real property owned by another Person. All persons who are not Pumping as of the date of filing the Complaint who seek to initiate Pumping as a De Minimis Pumper in the future shall submit an application to the Watermaster and the Watermaster shall determine whether the proposed Pumping will contribute to or threaten to contribute to Undesirable Results or other interest related to the Basin, and the application shall be denied if it contributes to or threatens to contribute to Undesirable Results or other interest related to the

19

20

13

28

Basin. Any such Watermaster determination may be appealed to the Court pursuant to the procedures described in Section VII, below. Notwithstanding any of the provisions of this Section III(H), to the extent this Court determines in the future that Pumping by De Minimis Pumpers has significantly contributed to or threatens to significantly contribute to Undesirable Results, this Court may regulate Pumping by De Minimis Pumpers as it deems prudent pursuant to its reserved jurisdiction provided in Section VII.

- I. In the interest of advancing the effective and efficient **BPA** Transfer. management of the Basin and the policy of maximizing the beneficial use of the Basin's Groundwater, consistent with Article X, section 2 of the California Constitution, all BPA may be Permanently Transferred or Leased, subject to the provisions of this Section III.I. Unless otherwise noted, all provisions within this Section III.I will be applicable to both Permanent Transfers and Leases.
- 1. Good Standing and Intervention Requirements. Permanent Transfers and Leases may only be completed in accordance with these rules by Parties to this Judgment in good standing (meaning both buyer and seller have paid all applicable Pump assessments, fees, charges or will do so prior to completion of the transfer, and are otherwise in compliance with this Judgment). A transferee who is not already a Party must intervene as a Party as a condition of completing any Lease or Permanent Transfer.
- 2. Anti-Speculation Provision. A buyer of BPA pursuant to a Permanent Transfer must own at least one acre overlying the Basin for every five acre-feet of BPA transferred to the buyer (the "Eligibility Requirement"). The "Anti-Speculation" provisions of this paragraph do not apply to BWD, the County, or an owner of an Original BPA Parcel so long as either (i) the BPA owner retains the same or greater quantity of acreage in proportion to its Original BPA or (ii) the BPA owner does not hold an amount of Annual Allocation in excess of the quantity of its originally granted BPA. As a condition of completing a Permanent Transfer, the Watermaster may demand that a BPA buyer (excepting BWD, the County and an owner of an Original BPA Parcel satisfying the criteria specified above) submit a deed reflecting the buyer's ownership in fee duly recorded, or Court order evidencing ownership by the buyer, of a legal

parcel or parcels overlying the Basin of sufficient acreage to satisfy the buyer's satisfaction of the Eligibility Requirement (the "Eligibility Proof").

- a. For purposes of establishing the Eligibility Proof, a buyer may show the requisite ownership of a legal parcel or parcels overlying the Basin to satisfy the Eligibility Requirement held in the name of the buyer, a subsidiary of the buyer where the buyer possesses at least a 51% ownership interest, or an affiliate of the buyer that has at least 51% common ownership with the buyer.
- 3. <u>Eligibility Violation</u>. In the event that the Watermaster determines that a buyer has not satisfied the Eligibility Requirement (an "Eligibility Violation"), the Watermaster will provide written notice of such Eligibility Violation to the buyer and such written notice will specify a period of not more than one year to cure such Eligibility Violation ("Cure Period"). To thereafter cure such Eligibility Violation, the buyer must submit the Eligibility Proof within the Cure Period. If the buyer fails to so cure the Eligibility Violation within the Cure Period, the BPA or that portion of the BPA to be transferred which is in excess of the Eligibility Requirement following the end of the Cure Period, which ever quantity is less, will be returned to the seller or lessor if required by the terms of the Permanent Transfer, or else forfeited by the buyer and such BPA will be permanently retired for the benefit of the Basin as a whole. No forfeiture of BPA or any portion thereof will be valid except by order of this Court upon noticed motion and after hearing.
- 4. <u>Transfer Records</u>. Except for the BWD, a mutual water company, and the County, upon completion of the Permanent Transfer, the BPA will be assigned to the buyer's Parcel(s) on the records of the Watermaster.
- 5. <u>Restrictions on Transfers</u>. In order to protect the Basin and protect against Undesirable Results, the Watermaster, with input from the Technical Advisory Committee, may restrict Permanent Transfers and Leases to specific areas of the Basin based on reasonable, evidenced-based concern that the Permanent Transfer or Lease will cause or exacerbate Undesirable Results, and then only in a manner that is equitable to all affected Pumpers.

- 6. BPA Transfers with Land Conveyances. With respect to a conveyance of a fee interest to a BPA Parcel or any portion thereof, the associated BPA will automatically transfer to the successor of said BPA Parcel unless: (i) the deed, or comparable instrument, conveying such BPA Parcel expressly excludes the BPA from the conveyance and provides that the BPA is retained by the conveying Party; and (ii) the conveying owner (grantor) records a "water rights restrictive covenant" against the parcel being conveyed with the San Diego County Recorder in a form substantially similar to the applicable example provided in Exhibit "6" to this Judgment ("Water Rights Restrictive Covenant") specifying the amount of BPA retained by the grantor (all or a portion) and subsequently delivers a copy of the recorded Water Rights Restrictive Covenant to the Watermaster. Such conveyed parcel will thereafter only be benefited by any residual BPA not retained by the grantor, and if all BPA is retained by the grantor, the conveyed parcel will cease to be benefited by BPA, and thus will no longer be a BPA Parcel, unless BPA is subsequently acquired and designated for the benefit of such parcel through a Lease or Permanent Transfer. Such Water Rights Restrictive Covenant must include a covenant prohibiting the future Pumping of Groundwater from the conveyed parcel in excess of any residual BPA not retained by the grantor, unless BPA is subsequently acquired for the benefit of that parcel. Within thirty days of the conveyance of a BPA Parcel with assigned BPA, the successor in interest to such BPA Parcel shall provide written notice to the Watermaster of the transfer of the BPA Parcel, and in the event the grantor has retained any BPA, a copy of the Water Rights Restrictive Covenant specifying the amount of BPA retained by the grantor. If grantor has retained any BPA consistent with the terms of this Section, the Water Rights Restrictive Covenant must identify the parcel(s) and wells(s) to which the retained BPA is to be subsequently assigned by the grantor.
- 7. <u>Compliance with Watermaster Review and for Permanent Transfers</u>. Except for a Permanent Transfer of BPA concurrently with the transfer of a BPA Parcel or a Permanent Transfer of a Party's BPA to other overlying parcels owned by that Party or its affiliates, all Permanent Transfers must be reviewed and approved by Watermaster prior to closing to consider the means by which Groundwater use will be permanently reduced to

27

28

Requirements (Sections III.I(2) above). 8. Permanent Transfer of BPA Separate from Parcel Transfer. If a Party's

BPA is Permanently Transferred from a BPA Parcel separately from a conveyance of a fee interest to the BPA Parcel, for the Permanent Transfer to become effective, (i) the Parties to the Permanent Transfer must comply with the fallowing standards set forth in **Exhibit "3"** and (ii) the Seller must record a Water Rights Restrictive Covenant against the BPA Parcel with the San Diego County Recorder and subsequently deliver a copy of the recorded Water Rights Restrictive Covenant to the Watermaster. The Water Rights Restrictive Covenant must specify the amount of BPA transferred from the BPA Parcel, include a covenant prohibiting future Pumping from the parcel from which the BPA is transferred inconsistent with the Permanent Transfer or the terms of this Judgment, and identify the parcel(s) and wells(s) to which the transferred BPA is to be assigned. If all BPA is transferred from the parcel, as specified in the Water Rights Restrictive Covenant, the parcel will cease to be benefited by BPA, and thus will no longer be a BPA Parcel, unless BPA is subsequently acquired and designated for the benefit of such parcel through a Lease or Permanent Transfer.

facilitate the Permanent Transfer of BPA and to confirm satisfaction of the Eligibility

9. Required Notices to Watermaster.

Leases. A Lease will only be effective after a written notice has been received by Watermaster, signed by both Parties to the Lease, specifying the amount of Annual Allocation leased, the term of the Lease, the well(s) to which the BPA is assigned during the term of the Lease, and if the BPA is then benefitted by Carryover, the amount of any Carryover leased to the lessee as a component of the Lease. If the Lease is for one or more Water Years other than the then-current Water Year, the notice will specify the BPA that correlates to the Lease in the future Water Years subject to the Lease (i.e., all Water Years subject to the Lease other than the current Water Year), and the amount of the Lease of Annual Allocation for such future Water Years will be determined by multiplying the amount of BPA to which the Lease correlates by the Pumping Percentage applicable to each of the future Water Years during the Lease.

- b. <u>Permanent Transfers</u>. A Permanent Transfer will only be effective after a written notice has been received by Watermaster, signed by both Parties to the Permanent Transfer, specifying the amount of BPA permanently transferred; the new BPA Parcel and well(s) to which the transferred BPA is to be assigned (excepting the BWD and County with respect to BPA Parcel); and certifying that the conditions in Sections 6 and 7 above have been satisfied; and, except for a transfer of BPA concurrently with the transfer of fee title to an Original BPA Parcel or a transfer of a Party's BPA to other overlying parcels owned by that Party (see Subsection D.5), no Permanent Transfer will be effective until the Seller has obtained approval from Watermaster for the sale of the BPA following Watermaster review.
- c. <u>Transfers of BPA Excluded from Conveyance of Parcel</u>. Upon written notice to the Watermaster, a Party may transfer all or any portion of that Party's BPA excluded from the conveyance in accordance with Section III.I(9)(b) to any other parcel or portion thereof overlying the Basin owned by that Party or its affiliate provided that such notice identifies the BPA Parcel(s) and well(s) to which the BPA is to be assigned.
- 10. <u>Transfer Costs.</u> All costs of transfers (including costs of any fallowing remediation) will be borne by the Parties to the transfer transaction, not by Pumping Assessments. Likewise, enforcement costs will be borne by the Parties to the transfer with the ability for the prevailing party to recoup its legal costs from the non-prevailing party. If the Watermaster is the prevailing party in a Watermaster enforcement action, the Watermaster may recoup its legal costs from the non-prevailing party. If the Watermaster is not the prevailing party in a Watermaster enforcement action, the Watermaster will provide for the payment of the costs and expenses of the Watermaster from the Watermaster Budget.
- 11. <u>Temporary Assignments</u>. Temporary assignment of Annual Allocation (for up to six months of use, which period may be extended for cause upon application to and approval of the Watermaster) will be allowed for well sharing during well maintenance and emergencies, which will be documented by the Parties to the well sharing and a notice signed by both Parties submitted to the Watermaster within 30 days of use for accounting on Watermaster

2.1

records identifying the nature of the emergency necessitating the temporary assignment, and the BPA Parcels and wells to which the Annual Allocation is assigned.

J. Fallowing Standards

- 1. <u>Applicable Standards</u>. For the purposes of avoiding blight associated with dead agricultural vegetation and to reduce potential air quality and public health impacts from wind-blown dust, if all or any portion of BPA is to be permanently transferred to another Party by way of permanently fallowing any portion of a Party's irrigated tree crop, the portion permanently retired from irrigation will follow any and all County standards as may be promulgated under the County's land use authority, including any standards imposed under any applicable CEQA document, as may apply. Provided, however, that the Minimum Fallowing Standards described in <u>Exhibit "3"</u> shall serve as the minimum fallowing standards, as supplemented by any County-imposed fallowing standards.
- 2. Compliance with Fallowing Standards. Where practicable, fallowing shall be undertaken prior to the consummation of a permanent transfer. Where pre-transaction fallowing is not practicable, one of the following methods shall be utilized to ensure fallowing is completed within 12 months of the transaction: (1) deposit with the Watermaster 120% of the funds needed to complete the fallowing; (2) securing of a security or performance bond in favor of the Watermaster in an amount equal to 120% of the anticipated cost of the fallowing; or (3) establishment of an escrow for the transaction with a reputable title company with a holdback from the purchase price equal to 120% of the anticipated cost of fallowing payable to the Watermaster if fallowing is not timely completed within 12 months of the transaction. The Watermaster shall be charged with certifying that fallowing standards have been met. Upon such certification, retained funds held by escrow or Watermaster shall be promptly refunded to the appropriate Party or Parties and/or security/performance bonds shall be released. The Party responsible for the costs of complying with the fallowing standards, including the cost of security, are to be negotiated between the Parties to the transfer.
- 3. <u>Fallowing Standards Applicable to Multi-Year Leases</u>. To the extent the Watermaster determines that a multi-year Lease of BPA has resulted in significant amounts of

11

12

13

14

15

16

17

18

19

20

2.1

22

23

24

25

26

27

28

dead trees or other crops on the land of the lessor Party and that the fallowing standards described in Section III.J(1). have been disregarded or not met for a period of at least 24 months, the Watermaster shall have authority to seek a Court order to compel fallowing or impose a monetary assessment to undertake fallowing. Watermaster will be entitled to recover its costs and attorney's fees from the lessor Party should Watermaster be a prevailing Party in such action. The provisions of this Subsection III.J(3) shall not apply to cover crops described in the Minimum Fallowing Standards attached as <u>Exhibit "3"</u> nor customary farming practices on the lessor property.

Fallowing and Water Credits. Annual Allocation associated with BPA that 4. is granted in relation to a conversion of water credits may not be exercised (i.e., Groundwater may not be Pumped pursuant to the BPA) nor the underlying BPA transferred until and unless (a) the fallowing standards set forth in this Judgment have been satisfied for the parcel(s) from which such water credits were generated, as approved by Watermaster, and (b) a restrictive covenant limiting Groundwater production on such parcel(s) was recorded as part of the water credits program, and if that was not recorded, then a new Water Rights Restrictive Covenant is recorded against such parcel(s). Within six (6) months of its formation, the Watermaster shall review the state of satisfaction of requirements (a) and (b) and issue a status letter to each applicable BPA holder informing them that these requirements have been met or what further action is necessary to satisfy these requirements. When the requirements are met, the BPA holder shall then update, if needed, the parcels (identified by assessor parcel numbers) and well(s) (identified by state well number(s)) to which the BPA is assigned and request necessary changes to Exhibit "4". Notwithstanding the foregoing, if the BPA holder meets the requirements of this Section J(4) upon or after receipt of the transfer status letter, such BPA holder will have all rights and be burdened with all responsibilities attendant to the BPA, including Carryover accrual, retroactively to the date of this Judgment.

K. Available Groundwater Storage Capacity

There exists in the Basin a substantial amount of available Groundwater storage capacity which is not utilized for storage or regulation of Groundwater. Such storage capacity can appropriately be

2.1

utilized for storage and conjunctive use of water that may in the future be imported to the Basin. It is essential that such storage capacity utilization be undertaken only under Watermaster control and regulation, in order to protect the integrity of the Basin, its Groundwater and any water imported to the Basin. Accordingly, any Person who wishes to store and Pump imported water in the Basin must do so pursuant to a storage agreement with Watermaster. All storage and recovery of imported water in the Basin, and all export of Groundwater Pumped from the Basin for use on lands that do not overly the Basin, is enjoined and restrained except pursuant to agreement with Watermaster. In any future allocation of Basin storage capacity by Watermaster, the needs and requirements of lands overlying the Basin and of the holders of BPA shall have priority and preference over storage for export.

L. Changes in Point of Extraction and New Wells.

Parties may change the point of Pumping on their real property for any BPA or portion thereof to another point of Pumping on the same Party's real property, whether by County-permitted new wells or replacement wells, so long as such change of point of Pumping does not cause Undesirable Results or interfere with an existing well of another Party.

IV. BASIN ADMINISTRATION

A. <u>Watermaster</u>. To assist this Court in the administration of this Judgment, this Court establishes a Watermaster. Watermaster shall administer and enforce the provisions of this Judgment (including the administration of the Physical Solution) and any subsequent instructions or orders of this Court. Watermaster shall, in carrying out its duties, powers and responsibilities herein, act in an impartial manner without favor or prejudice to any Pumper or Party.

B. Watermaster Board

1. <u>Composition and Selection</u>. The Watermaster Board will be comprised of five members, with each member having one vote, as follows: one representative and one alternate representing the BWD; one representative and one alternate representing the County; one representative and one alternate representing the agricultural sector Parties; one representative and one alternate representing the recreational sector Parties; and one public/community representative and one alternate. The Parties within the respective agricultural

and recreational sectors, and the process for selecting the respective agricultural, recreational, and public/community representatives are specified in **Exhibit "7**." Any Watermaster Board member or alternate may be removed by the Court for cause. Any vacancy on the Watermaster Board shall be filled by the same procedure used in the appointment of the vacant seat.

- 2. <u>Decisions of the Watermaster</u>. Except for decisions concerning a subject matter for which a Supermajority Vote is required for approval, as specified in Section IV.B(3) below, a decision agreed to by a majority of the Watermaster Board made when a quorum is present will be a decision of the Watermaster; provided, however, that no action of the Watermaster Board shall become effective without the affirmative vote of at least three members of the Watermaster Board. A quorum constitutes three members of the Board. All Watermaster decisions are final when made and may be appealed to this Court pursuant to Section VII.
- 3. <u>Supermajority Subject Matters</u>. Decisions by the Watermaster Board concerning the following subject matters must receive a Supermajority Vote for approval
- a. Decisions concerning the Watermaster Budget inclusive of the Pumping Assessments;
- b. Any change in the Watermaster Budget resulting in an increase of more than \$50,000;
 - c. Establishment of the rate of Overproduction Penalty Assessments;
 - d. Approval of capital projects;
 - e. Borrowing of funds; and
 - f. Purchasing or disposing of real property.
- 4. <u>Watermaster Board Meetings</u>. All Watermaster Board meetings and hearings must be conducted in substantial accordance with the requirements of the California open meeting laws under Government Code sections 54950 et seq., otherwise known as the "Brown Act". Provided, however, that notwithstanding Government Code, section 54953(b)(3), at least two of the Watermaster Board members shall participate in Board meetings from locations overlying the Basin. Further, because the Watermaster Board acts under the authority of the Superior Court and does not qualify as a "local agency" under Government Code section

28

54951, any and all challenges to Brown Act compliance by the Watermaster Board may be heard only by the Superior Court Judge with continuing jurisdiction over the Judgment in the underlying action, in compliance with the requirements of the Judgment. Regular Watermaster meetings must be noticed with an agenda and supporting materials made available to the public at least three days prior to the meeting, and shall be open to the public in a public location that overlies the Basin. Meeting minutes must be taken of all Watermaster Board meetings, a copy of which must be furnished to any member of the public requesting such minutes.

C. Watermaster Staff. Watermaster may hire employees or contractors as needed, which may include without limitation (a) one or more technical advisors to provide input to the Technical Advisory Committee, Watermaster staff and the Watermaster Board, (b) a person to prepare meeting notes, prepare an Annual Report to this Court, and administer this Judgment and (c) an attorney to advise and represent the Watermaster. In order to avoid a potential conflict of interest, the Watermaster Technical Consultant (interim or otherwise) must be independent (not under contract with any Party) and selected by the Watermaster with input from the Technical Advisory Committee through an arms-length RFP process, unless otherwise agreed to by a Supermajority Vote of the Watermaster. Any technical advisor, attorney, executive director, or similar employee or contractor performing services that concern technical or policy matters must be independent (not under contract with any Party) and selected by the Watermaster (and if a technical advisor, following input from the Technical Advisory Committee) through an armslength RFP process unless otherwise agreed by a Supermajority Vote. Any other Watermaster employee or contractor may be employed by, or under contract with a Party, provided that he or she abides by any relevant Court orders, Watermaster determines that the employee or contractor will not be issuing technical or policy recommendations to Watermaster, and the retention of the employee or contractor is appropriate to perform services to Watermaster in the most effective and cost-efficient manner.

D. <u>Rules and Regulations</u>. The Watermaster will operate pursuant to the Watermaster Rules and Regulations attached hereto as <u>Exhibit "5</u>." The Watermaster may amend the Watermaster Rules and Regulation by Supermajority Vote after public hearing, noticed to all

Parties, with a specific draft of the proposed modifications, no less than thirty days prior to the date of the hearing thereon. Upon the request of any objecting member of the Watermaster, the Watermaster must obtain Court approval of any proposed changes before they become effective.

E. Watermaster Powers and Responsibilities.

- 1. <u>Powers</u>. Subject to the continuing supervision and control of this Court, the Watermaster will have and may exercise: (i) the powers and duties set forth for a GSA pursuant to Water Code sections 10725 through 10726.5 and 10726.8 to the extent not inconsistent with any provision of this Judgment and subject to the limitations under SGMA; and (ii) any specific powers, authority and duties granted or imposed elsewhere in this Judgment.
- 2. <u>Notice List</u>. The Watermaster shall maintain a current list of Parties to receive notice hereunder.
- 3. <u>Annual Budget Process</u>. The Watermaster shall prepare a Watermaster Budget for each Water Year, hold hearings thereon, and adopt a final Watermaster Budget. The annual Watermaster Budget will be determined by the Watermaster in an amount necessary to fulfill the duties of Watermaster as prescribed by this Judgment and a reasonable reserve, all of which will be subject to review and revision by the Court pursuant to Section VII. Following the adoption of the Watermaster Budget, expenditures within budgeted items may thereafter be made by Watermaster in the exercise of powers herein granted, as a matter of course. Commencing with the Watermaster Budget for the 2021-2022 Water Year, the annual budget process to determine the budget for the following Water Year will be as follows:

Completion Deadline	Action
June 30^2	Watermaster publishes the Watermaster Budget for ensuing Water Year
July 31	Any challenge to the budget by a Party must be initiated by notice to the Watermaster
August 30	Mediation of any challenge to the budget is completed pursuant to Section VII.A(1)

² These dates commence in June preceding the beginning of the ensuing Water Year on October 1st for which the Watermaster Budget is being calculated. Therefore, Watermaster will publish the Watermaster Budget for the 2021-2022 Water Year on or before June 30, 2021.

1 2	October 15	Any challenge to the budget by a Party unresolved by mediation will be heard by the Court	
$\begin{bmatrix} 2 \\ 3 \end{bmatrix}$	October 15	Watermaster issues notice to each Party of that Party's prior Water Year	
4		Pumping (specifying the amount of Pumping of Annual Allocation and Carryover, respectively), and the maximum amount of Annual	
5		Allocation eligible for Carryover from the preceding Water Year. Watermaster also provides each Party an estimate of the Pumping Assessment to assist Parties in making informed decisions regarding Carryover election and any election not to Pump or Carryover Annual	
7		Allocation in the ensuing Water Year	
8	October 31	Court order is entered on any Party's challenge to budget heard by the Court	
9	October 31	Each Party informs Watermaster of Carryover election and amount, and any election to forego Pumping and Carryover of its Annual Allocation	
10		in the ensuing Water Year. Any Party that did not Pump Groundwater during the preceding Water Year that intends to Pump Groundwater in	
12		the ensuing Water Year informs Watermaster of such election.	
13	November 30	Watermaster provides Pumping Assessment invoice, based on the Adjusted Pumping Calculation for the preceding Water Year, to each Party for first installment of Pumping Assessment	
14	December 31	First installment of Pumping Assessment due	
15	May 31	Watermaster provides Pumping Assessment invoice, based on the	
16		Adjusted Pumping Calculation for the preceding Water Year, to each Party for second installment of Pumping Assessment	
17	June 30	Second installment of Pumping Assessment due	
18			
19	4. <u>P</u>	umping Assessments. The annual Watermaster Budget costs in excess of	
20	applicable grants, loans, any Overproduction Penalty Assessment funds elected by Watermaster		
21	to be applied to the Watermaster Budget (i.e. any such funds not used to Lease Annual Production		
22	to offset the Overproduction), and assessments levied and collected on the State Park and the		
23	Borrego Springs Unified School District for their Pumping will be funded by a uniform "Pumping		
24	Assessment". To determine each Party's Pumping Assessment, Watermaster will first determine		
25	for each Party an "Adjusted Pumping Calculation," which will equal the Amount of Annual		
26	Allocation Pumped by the Party during the preceding Water Year (or by the Party's lessee if the		
27	Party has Leased any portion of its Annual Allocation to another Party), minus the amount of		
28			
		2.4	

Carryover Pumped during the preceding Water Year³ by the Party (or any lessee of the Carryover) and minus any amount of Groundwater Pumped pursuant to a Lease of Annual Allocation or Carryover from another Party, plus the amount of Carryover elected for the ensuing Water Year by the Party. The amount of each Party's Pumping Assessment will be calculated by multiplying the amount of the annual Watermaster Budget against a percentage derived by dividing the amount of the Party's Adjusted Pumping Calculation by the total of all Parties' Adjusted Pumping Calculations. If a Party timely notifies Watermaster that no Pumping will occur pursuant to the Party's BPA during the ensuing Water Year and that the Party will not Carryover any of its Annual Allocation from the preceding Water Year, that Party's Adjusted Pumping Calculation shall be excluded from the total of all Parties' Adjusted Pumping Calculations in calculating Pumping Assessments for the ensuring Water Year under this Subsection IV(E)(4) and the Party will not be assessed a Pumping Assessment in the ensuing Water Year. Under such election, no Pumping may be made pursuant to the applicable Annual Allocation during the ensuing Water Year. If a Party electing to forego Pumping in a Water Year pursuant to a BPA subsequently elects to Pump Groundwater pursuant to the BPA in a future Water Year (i.e., any Water Year after the ensuing Water Year) or transfers the BPA to another Party pursuant to a Lease or Permanent Transfer and the transferee elects to recommence Pumping in the future Water Year pursuant to the BPA, the Party's Adjusted Pumping Calculation for purposes of determining the amount of the Party's (or the transferee's) Pumping Assessment during the Water Year in which it intends to recommence Pumping will be determined on the basis of the Party's Annual Allocation in effect during the preceding Water Year (i.e., for purposes of calculating the Pumping Assessment the Party [or transferee] will be deemed to have Pumped the applicable Annual Allocation during the preceding Water Year). The cumulative Adjusted Pumping Calculations used as the denominator for determining Pumping Assessments will be adjusted in a like amount.

³ There will be no Carryover Pumped during the 2020-2021 Water Year because this will be the first Water Year with Annual Allocations.

2.1

a. <u>Process</u>. The Watermaster shall file an Annual Report with this Court not later than February 1 of each Water Year beginning February 1 following the first full Water Year after entry of Judgment. Prior to filing the Annual Report with this Court, Watermaster shall notify all Parties that a draft of the Annual Report is available for review and shall provide notice of a hearing to receive comments and recommendations for changes in the report. The notice of hearing may include such summary of the draft report as Watermaster may deem appropriate. Watermaster shall also distribute the Annual Report to the Parties requesting copies and file it with DWR.

b. <u>Contents</u>. The Annual Report shall include the information set forth in Water Code section 10728 and 23 California Code of Regulations section 356.2, an annual fiscal report of the operation of Watermaster during the preceding Water Year, an audit of all assessments and expenditures by Watermaster, a summary of the management of the Basin and Watermaster activities pursuant to this Judgment, a summary of aggregate Pumping, a record of Leases and Permanent Transfers of BPA and the amount of Carryover held by each Party, any recommendations to the Court concerning further orders of this Court to advance the Sustainable Groundwater Management for the Basin, and such additional information as may be required by order of the Court.

- 6. <u>Pumping Reports</u>. Each Pumper shall transmit to Watermaster, pursuant to procedures and time schedules to be established by Watermaster, water production data from the Pumper's meter system. Each Pumper shall annually file with Watermaster, on a form to be prescribed by Watermaster, a report that provides: (i) a written verification by the manufacturer or qualified meter installer certifying the ongoing accuracy of the meter readings and meter calibration, as well as verification that there are no valves or other devices upstream of the meter that could lead to pumped water being diverted before being read by the meter; and (ii) such additional information as may be required by order of the Court.
- 7. <u>Meetings with the Technical Advisory Committee</u>. The Watermaster shall meet on a regular basis and at least semi-annually with the Technical Advisory Committee to review Watermaster activities pursuant to this Judgment and to receive advisory

recommendations from the Technical Advisory Committee. <u>Unauthorized Pumping</u>. The Watermaster shall undertake any action, including bringing any motion to the Court, necessary to enjoin unauthorized Pumping.

- 9. <u>Data, Estimates and Procedures</u>. The Watermaster shall use, among other available data, BVHM runs and best available records and data to support the implementation of this Judgment. Where actual records of data are not available, Watermaster shall rely on and use sound scientific and engineering estimates for the BVHM runs. Watermaster may use preliminary records of measurements, and, if revisions are subsequently made, Watermaster may reflect such revisions in subsequent accounting.
- 10. <u>Watermaster's Access to Private Property</u>. Watermaster may enter the private property of Parties for the purpose of administering its responsibilities under this Judgment, provided that, excepting any entry only for the specified water quality monitoring and alternative meter inspection purposes pursuant to Sections VI(A) and VI(B), such entry may only be made at the permission of the Party and following execution of another Entry Agreement as specified in <u>Exhibit "8"</u> specifying the other activities to be undertaken, or pursuant to or an inspection warrant under Water Code section 10725.4.
- Appointing Entity Liability. As a special master of this Court, Watermaster will not be held liable to any Person for any injury, at law or in equity, alleged to result or arise from, Watermaster's actions or omissions. The Court may, however, through noticed motion to this Court under the continuing jurisdiction provisions set forth in Section VII of this Judgment, order Watermaster to effect an appropriate remedy for any Person demonstrating an injury resulting from Watermaster's actions or omissions, including without limitation payment of monetary sums. No Watermaster Board member or officer, nor any Person appointing a Watermaster Board member, will be held liable for any injury arising from or relating to a Watermaster Board member's or officer's service on behalf of Watermaster if such Board member or officer conducted himself or herself in good faith and reasonably believed that his or her conduct was lawful and in compliance with the Judgment, Rules and Regulations of the Watermaster and

G. Technical Advisory Committee

1. <u>Selection of Technical Advisory Committee</u>. A Technical Advisory Committee is established to advise the Watermaster on technical matters. TAC meetings may be conducted by meeting within the Basin, by telephone conference, or by web-based video conference, as determined by the TAC members from time to time. TAC meetings shall be open to the public, and shall provide an opportunity for public comment. Membership of the Technical Advisory Committee will be open to an expert hired by any Party holding BPA or the County. To participate on the Technical Advisory Committee, the expert must be a California licensed hydrogeologist, California licensed engineer, professional hydrogeological modeler, professional Groundwater statistician, or other California licensed member of a recognized professional discipline approved by the Watermaster. The Technical Advisory Committee will endeavor to decide all matters by consensus. If consensus cannot be achieved, the Technical Advisory Committee will present a report to the Watermaster describing the differences of opinion and

orders of the Court. If any dispute arises concerning the satisfaction of this criteria for such

exemption of liability pursuant to the preceding sentence, the Court will determine such matter on

noticed motion pursuant to the continuing jurisdiction provisions set forth in Section VII of this

Judgment. If this Court determines in such a proceeding that the Board member's or officer's

conduct was made in good faith and pursuant to a reasonable belief that his or her conduct was

lawful and in compliance with the Judgment, Rules and Regulations of the Watermaster and

orders of the Court, then: (i) any monetary remedies ordered by this Court will not be paid by the

subject Watermaster Board member, officer, or appointing Person, but rather by Watermaster;

and (ii) any reasonable attorney fees, costs, or other expense incurred by such Watermaster Board

member, officer, or appointing Person in defense of, or as a result of, the matter will be paid in

advance or reimbursed by Watermaster. Watermaster shall obtain and maintain liability

insurance, including Officers and Directors coverage, in amounts reasonably necessary to cover

Watermaster's obligations under this Section IV.F, provided that Watermaster shall only be

obligated to obtain as much of such insurance as is available to Watermaster at reasonable rates.

28

arguments in support thereof, with a draft of the report circulated for comment and input by all Technical Advisory Committee members prior to submission of the report to Watermaster.

- Technical Advisory Committee Duties and Responsibilities. The Technical 2. Advisory Committee's responsibilities will include, without limitation, making recommendations based on best science and data collected regarding the Water Budget and the avoidance of Undesirable Result, determined by the TAC based on best available data, including without limitation information generated from BVHM model runs. Such assessment must consider all inflows and outflows from the Basin, including without limitation mountain front underflow and flux into the Borrego Springs Basin across the Coyote Creek fault and all other underflows, agricultural and recreational irrigation return flows; specific yield differences of the three aquifers (upper, middle and lower) within the different Management Areas of the Basin; and other matters approved by the Watermaster to improve upon initial assumptions regarding the Water Budget that will enable better Adaptive Management of the Basin.
- H. **Environmental Working Group**. An Environmental Working Group (EWG) will be established to advise the Watermaster on GDE and any other matters approved by the The EWG budget, which shall be adequate for the EWG to carry out its Watermaster. responsibilities as directed by the Watermaster, will be included in the Watermaster Budget.

V. ASSESSMENTS

- **Authorized Assessments.** The Watermaster is authorized to set, levy and collect Α. assessments from the Parties as described herein.
- 1. Pumping Assessment. The Watermaster shall provide an invoice for the assessed Pumping Assessment to each Party pursuant to the schedule set forth in Section IV.E(3). Each Party who does not timely notify Watermaster of their election to forego Pumping and Carryover of its Annual Allocation in the ensuing Water Year will be liable for the payment of such invoice regardless of whether they subsequently Lease or Permanently Transfer part or all of their Annual Allocation during that Water Year. An appeal of the Watermaster's calculation of any Pumping Assessment must be brought pursuant to Section VII of this Judgment within thirty (30) days of receipt of Watermaster's invoice. Payment of any Pumping Assessment appealed to

the Court must be made within ten (10) days following the Court order on appeal. If payment is not made on or before the applicable due date, the Watermaster will add a penalty of one percent (1%) per month thereof to such Party's statement.

- 2. Overproduction Penalty Assessment. The Watermaster shall provide an invoice for an Overproduction Penalty Assessment to each Party who produces in excess of the Party's Max Overproduction Limit, subject to Section III.G herein no later than thirty (30) days following the end of the Water Year in which the Overproduction occurred. Any appeal of an assessed Overproduction Penalty Assessment must be brought pursuant to Section VII of this Judgment within thirty (30) days of receipt of Watermaster's invoice for the Overproduction Penalty Assessment. Unless timely appealed, payment of Watermaster's invoice for the Overproduction Penalty Assessment must be made within ten (10) days of receipt of the invoice.
- 3. Failure to Pay Assessment and Enforcement of Assessments. If a Party knowingly fails to pay an assessment after receipt of the notice of assessment pursuant to the terms of this Judgment within 30 days of it becoming due pursuant to the terms of this Judgment, the Party shall be liable to the Watermaster for interest at a rate of 1 percent per month on the delinquent amount of the assessment and a 10-percent penalty of the amount of the assessment without any interest thereon, consistent with Water Code section 10730.6(b). To collect payment of any delinquent assessment properly levied pursuant to this Section V, Watermaster may exercise the same collection methods authorized to a GSA under Water Code section 10730.6 or the statutory authority of BWD to collect on the tax rolls unpaid assessments pursuant to the BWD's enabling legislation (Wat. Code, §§ 37200 et seq.).

VI. WELL METERING AND WATER QUALITY TESTING

A. Meter Installation for the Purpose of Accurately Measuring Water Use. Parties holding BPA will install and maintain, at their own expense, meters approved by Watermaster that can electronically transmit a recording of the amount of Groundwater Pumped from the Basin and other data to the Watermaster in real time on a schedule as determined by the Watermaster. This meter program will result in cost savings by avoiding the need for the Watermaster to physically read, inspect and validate the accuracy of meters. Alternatively, any

22

23

24

25

26

27

28

Party holding BPA may elect to install and maintain, at its own expense, other meters approved by Watermaster on condition that: (i) the Watermaster physically read the meters on the schedule determined by the Watermaster and the Party pay all costs associated with the Watermaster's reading, accounting and reporting related to such meters; and (ii) the Party has executed an Entry Agreement as specified in **Exhibit "8"** for the purpose of allowing Watermaster access to the Party's well.

B. Water Quality Monitoring Plan

- 1. **Purpose**. Regular water quality monitoring is essential to avoiding Undesirable Results and achieving Sustainable Groundwater Management for the Basin.
- 2. **Administration**. Water quality monitoring will be conducted at times and places established by a water quality monitoring plan, which will include a designated network of monitoring wells, developed by the Watermaster with Technical Advisory Committee input within 24 months of entry of Judgment. The Watermaster will determine if changes in water quality are significant and unreasonable following consideration of the cause of impact, the affected beneficial use, potential remedies, input from the Technical Advisory Committee, and subject to approval by this Court exercising independent judgment. Any Party may appeal the approval of the water quality monitoring plan to this Court for resolution pursuant to Section VII. Qualified Watermaster staff or consultants are permitted to access private property for the sole purpose of water quality testing under the approved water quality monitoring program in compliance with the terms of an Entry Agreement with the landowner. Such Entry Agreement must be in substantial compliance with the form of agreement attached hereto as Exhibit "8," which will protect the landowner from liability for damage and injury resulting from Watermaster's entry onto the parcel (including naming the landowner and all businesses operating on the property as additional insured), provide for advance notice, limit activities on the parcel to those necessary to accomplish the purpose of the entry, avoid undue interference with agricultural or other business activities upon the parcel, and ensure the safety of third parties entering onto operating agricultural properties. Nothing in this Judgment shall preclude the Watermaster from obtaining an inspection warrant under Water Code section 10725.4.

DECISIONS Jurisdiction Reserved. Consistent with Section 852 of the Code of Civil Procedure, full jurisdiction, power and authority are retained by and reserved to this Court for purposes of enabling this Court upon the noticed motion of any Party or the Watermaster, or sua sponte, to make such further or supplemental orders or directions as may be necessary or

CONTINUING JURISDICTION AND APPEAL OF WATERMASTER

appropriate for: (i) the operation of the Physical Solution established by this Judgment; (ii) interpretation, enforcement or carrying out of this Judgment, or (iii) the modification,

amendment, or amplification any of the provisions of this Judgment, or to add to the provisions

hereof, consistent with the rights herein decreed.

Contested Watermaster decisions or other matters of disagreement will be reviewed by this Court upon noticed motion of any Party, any Watermaster Board member or the Watermaster. The Court review shall be de novo, without evidentiary weight to the Watermaster action or decision. The decision of the Court upon any such motion shall be an appealable "Supplemental Order" in this case. When the Supplemental Order is final it shall be binding upon the Watermaster and the Parties. With the exception of motions to review the Watermaster Budget or any assessment issued by Watermaster, which are subject to a thirty (30) day filing deadline, any such motion must be filed with the Court within ninety (90) days of the Watermaster decision or action or it is barred. Unless otherwise agreed by all Parties in disagreement, any Watermaster Boardmember in disagreement, and Watermaster if the dispute involves Watermaster ("Party(ies) in Disagreement"), upon filing a motion with this Court to resolve the disagreement, the Parties in Disagreement shall first engage in mediation, which mediation will extend the Court hearing date for up to sixty (60) days while the mediation is pending. Unless otherwise provided for herein or the Parties in Disagreement agree otherwise, the mediation will be initiated and conducted under the applicable rules of the American Arbitration Association that are applicable as of the date of the dispute. The mediation will be limited to one full day unless extended by the Parties in Disagreement. The Parties in Disagreement participating in any such mediation will be responsible for their own individual

costs of participation and shall split evenly the cost of the mediation unless the Watermaster is a Party in Disagreement, in which case the Watermaster shall contribute 50% of the cost, using funds from Watermaster's annual budget, and the other 50% of the cost will be split evenly among the other Parties in Disagreement participating in the mediation.

- 2. This Court may appoint an independent special master or referee to advise this Court with respect to any dispute.
- 3. Annual status conferences will be established as part of this Judgment for the Watermaster to report to this Court, for this Court to consider any matters presented by the Watermaster requiring Court approval, and for review of any disputed matters noticed for hearing on the date of the annual status conference in accordance with this Section VII.A(3).
- **B.** <u>Watermaster Enforcement</u>. Watermaster (as well any Party upon Watermaster's failure or refusal to enforce) may petition this Court to issue enforcement orders, upon noticed motion and after hearing, as necessary to remedy any non-compliance with the terms of this Judgment. Watermaster is also authorized to coordinate with the County in connection with County enforcement of land use and nuisance ordinances related to fallowing.

VIII. FINDINGS

- **A.** The Judgment is consistent with Section 2 of Article X of the California Constitution, requiring that the water resources of the State be put to beneficial use to the fullest extent possible.
- **B.** The Judgment is consistent with the water right priorities of all non-stipulating Parties and any Persons who are De Minimis Pumpers.
- C. The Judgment treats all objecting Parties and any persons who have claims that are exempt equitably as compared to the Stipulating Parties.
- **D.** Plaintiff complied with the service and notice provisions of Code of Civil Procedure sections 835 and 836, which compliance is deemed effective service of process of the Complaint and notice on all interested parties of the Comprehensive Adjudication of the Basin for purposes of establishing in rem jurisdiction and the comprehensive binding effect of the Comprehensive Adjudication, consistent with Code of Civil Procedure sections 836(j) and 851.

18

19

20

21

22

23

24

25

26

27

28

IX. BINDING EFFECT

continuing jurisdiction.

The Judgment is binding on the Parties to the Comprehensive Adjudication and all their successors in interest, including, but not limited to, heirs, executors, administrators, assigns, lessees, licensees, the agents and employees of the Parties to the Comprehensive Adjudication and all their successors in interest, and all landowners or other persons claiming rights to Pump Groundwater from the Basin, consistent with Code of Civil Procedure section 851. The Judgment also is an in rem judgment binding on all real property overlying the Basin. The Watermaster may cause this Judgment to be recorded against any or all parcels overlying the Basin. The seller of any real property subject to this Judgment shall notify the purchaser of the existence of the Judgment and its binding effect on the real property.

All rights to Pump and store water in the Basin are comprehensively determined

Pumping by Parties that are De Minimis Pumpers as of the time of the filing of the

by this Judgment consistent with Code of Civil Procedure sections 830(b)(7) and 834. All

unexercised rights and future rights to Pump water in the Basin are subordinated to all rights of

the Parties currently being exercised and rights authorized under this Judgment, consistent with

Complaint does not presently have a material effect on the groundwater rights of other Parties.

Accordingly, this Judgment does not presently regulate a Party that was Pumping Groundwater as

a De Minimis Pumper as of the time of the filing of the Complaint, provided the Pumping by such

De Minimis Pumper remains within the two acre foot use limitations established in this Judgment

and provided that such De Minimis Pumper does not seek to transfer their Pumping to another

real property owned by another Person. The Court may revisit and change this finding upon a

showing of necessity for the Adaptive Management of the Basin pursuant to the Court's

X. MISCELLANEOUS PROVISIONS

A. <u>Water Quality</u>. Nothing in this Judgment shall be interpreted as relieving any Party of its responsibilities to comply with State or Federal laws for the protection of water

quality or the provisions of any permits, standards, requirements, or orders promulgated thereunder.

- **B.** Well Abandonment. The Parties and Watermaster agree to cooperate with the County in the enforcement of the County's well abandonment ordinance in effect in the Basin as improperly abandoned wells have the potential to provide a migration pathway of contaminants into the Basin.
- **C.** <u>Designation of Address for Notice and Service</u>. Each Party shall designate the name, address, and e-mail address to be used for purposes of all subsequent notices and service, either by its endorsement on this Judgment or by a separate designation to be filed within thirty days after Judgment has been entered. This designation may be changed from time to time by filing a written notice of such change with Watermaster. Any Party desiring to be relieved of receiving notices may file a waiver of notice on a form approved by the Watermaster. If no designation is made, a Party's designee shall be deemed to be, in order of priority: i) the Party's attorney of record; ii) if the Party does not have an attorney of record, the Party itself at the address specified on the Watermaster's list.
- **D.** <u>Notice and Service of Documents</u>. All notices or service of documents pursuant to this Judgment by Watermaster or any Party will be made by electronic mail to the greatest extent feasible.
- E. No Abandonment of Rights. In the interest of the Basin and its water supply, and the principle of reasonable and beneficial use, no Party shall be encouraged to Pump and use more water in any Water Year than is reasonably required. Failure to Pump all of the Groundwater to which a Party is entitled will not be deemed or constitute a forfeiture or an abandonment of such Party's right, in whole or in part, except upon a written election by the Party holding the BPA or by order of the Court exercising continuing jurisdiction under Section VII upon noticed motion and after hearing.
- **F.** <u>Costs.</u> Except subject to any existing Court orders and stipulations or separate agreement of one or more Parties, each Party shall bear its own costs and attorneys' fees arising from the Comprehensive Adjudication.

Plaintiff BORREGO WATER DISTRICT and Defendants (collectively, the "Stipulating Parties") hereby stipulate and agree as follows:

- To entry of the proposed Stipulated Judgement, attached hereto as Exhibit "A" and incorporated herein by reference, by the Court pursuant to Code of Civil Procedure sections 830 et seq., to (i) comprehensively determine and adjudicate all groundwater rights in the Borrego Springs Subbasin ("Basin") of the Borrego Valley Groundwater Basin, whether based on appropriation, overlying right, prescriptive right, or other basis of right in the Basin; and (ii) establish a physical solution for the perpetual and sustainable management of the Basin consistent with the substantive objectives of the Sustainable Groundwater Management Act ("SGMA") and the reasonable and beneficial use of the Basin required by Article X, section 2 of the California Constitution. .
- 2. This Stipulation shall bind and benefit them, and will be binding upon and benefit all their respective heirs, successors-in-interest, and assigns prior to and until entered by the Court. In the event, the Stipulated Judgment is contested by third parties and not entered by the Court, this Stipulation will not bind any Stipulating Party.
- 3. Each signatory to this Stipulation represents and affirms that he or she is legally authorized to bind the Stipulating Party on behalf of whom he or she is signing.

Minimum Fallowing Standards

- All agricultural tree crops shall be destroyed (e.g., chipped or burned).
- All land where the crops were destroyed shall be stabilized (e.g. mulched with the resulting tree crop chippings or ash, planted with rye grass, barley or other acceptable cover crop, application of other product to aid in dust abatement, or combination thereof).
- All irrigation wells not used for irrigation of other property, for monitoring or for other allowable purposes shall be properly abandoned, converted to monitoring wells, or otherwise exempted under applicable County standards.
- All above ground irrigation lines/piping shall be permanently removed.
- All hazardous materials (e.g., drums of used oil) will be removed from the fallowed site.
